*Calculated as at 31 October 2020

ISIN Code	GB00B4130Q19
Sedol Code	B4130Q1

Fund Objective

The Fund aims to achieve capital growth over the medium to longer term (not less than 5 years).

Investment Strategy

The Fund will invest not less than 80% of its assets directly or indirectly in UK shares (meaning shares of companies that are listed and domiciled in the UK, or incorporated in the UK, or have a significant exposure to the UK). Indirect exposure to the shares will be achieved by investing in collective investment schemes such as unit trusts, open-ended investment companies, other UCITS funds, exchange traded funds and closed-ended schemes. The Fund may also invest directly in individual stocks (most likely in times of market stress). Foreign currency exposure may be hedged back into £-Sterling. The Fund may also invest in other transferable securities, money market instruments, cash and near cash and deposits in seeking to meet the investment objective. The Fund may (infrequently and in times of market stress) use certain financial contracts (derivatives) for efficient portfolio management (including hedging). The use of derivatives for efficient portfolio management should not lead to an increase in risk to the Fund. The Fund does not currently but may at any time in the future use securities lending for the purposes of efficient portfolio management.

Issued by Octopus Investments Limited, which is authorised and regulated by the Financial Conduct Authority. Registered office: 33 Holborn, London EC1N 2HT. Registered in England and Wales No. 03942880. Telephone calls are recorded. CAM011979. Issued: April 2022.

Glossary

Asset allocation

This describes the allocation of the portfolio's assets according to geographical region, sector or type of security.

Authorised Corporate Director (ACD)

The term used to describe the manager of an Open Ended Investment Company (OEIC). An ACD has the same role and responsibilities as their unit trust equivalents, known as a fund manager.

Bonds

A loan in the form of a security, either issued by a UK or overseas government (government bonds) or company (corporate bonds), which pays a fixed rate of interest over a given time period, at the end of which the initial amount borrowed is repaid.

Closed-ended fund

A closed-ended fund, such as an investment trust, has a fixed number of shares and is structured in a similar way to a company.

Equities

Shares of ownership in a company.

Hedging

Making an investment to reduce the risk of adverse price movement in an asset. Normally, a hedge consists of taking an offsetting position in a related security, such as a futures contract.

Total Expense Ratio

The total cost of investing in a fund, expressed as a percentage of the value of your investment. It is more common nowadays to look at the 'Ongoing charges figure', which you will find in the 'Key Investor Information Document'.
