Total Expense Ratio*	1.10%

\*Calculated as at 31 October 2018

ISIN Code	GB00B41NRM60
Sedol Code	B41NRM6

## Fund Objective

The Fund aims to achieve a balance of income and capital growth over the medium to longer term, the total of which is in excess of that of the global fixed interest market, hedged into pounds sterling.

## Investment Strategy

The Fund aims to generate a return which is in excess of that of the global fixed interest market average as measured by generally accepted broad market indices, like the Merrill Lynch Sterling Broad Market or Citigroup World Broad Investment Grade Bond. It will seek to achieve its objective through investments primarily in fixed interest securities, through shares and units of collective investment schemes such as unit trusts, OEICs and other UCITS funds, closed-ended schemes and individual gilts and bonds. Foreign currency exposure may be hedged back into pounds sterling. The Fund may also invest, at the ACD's discretion, in other transferable securities and collective investment schemes, money market instruments, cash and near cash and deposits to meet the investment objective. Stocklending, borrowing, cash holdings and derivatives may be used for hedging and other investment techniques for efficient portfolio management.

## Asset Allocation (%)

Issued by Octopus Investments Limited, which is authorised and regulated by the Financial Conduct Authority. Registered office: 33 Holborn, London EC1N 2HT. Registered in England and Wales No. 03942880. Telephone calls are recorded. CAM008257. Issued: May 2019.

Glossary

**Asset allocation**

This describes the allocation of the portfolio's assets according to geographical region, sector or type of security.

**Authorised Corporate Director (ACD)**

The term used to describe the manager of an Open Ended Investment Company (OEIC). An ACD has the same role and responsibilities as their unit trust equivalents, known as a fund manager.

**Bonds**

A loan in the form of a security, either issued by a UK or overseas government (government bonds) or company (corporate bonds), which pays a fixed rate of interest over a given time period, at the end of which the initial amount borrowed is repaid.

**Closed-ended fund**

A closed-ended fund, such as an investment trust, has a fixed number of shares and is structured in a similar way to a company.

**Equities**

Shares of ownership in a company.

**Hedging**

Making an investment to reduce the risk of adverse price movement in an asset. Normally, a hedge consists of taking an offsetting position in a related security, such as a futures contract.

**Total Expense Ratio**

The total cost of investing in a fund, expressed as a percentage of the value of your investment. It is more common nowadays to look at the 'Ongoing charges figure', which you will find in the 'Key Investor Information Document'.
