Data as at 30 April 2019

Key Facts

Launch Date 28 September 2009
 Currency GBP Sterling
 Suggested Time Horizon* 12–15 Years +

*There is no required minimum holding period

Risk Scale

Objective

A global growth strategy which aims to deliver the highest returns achievable, through a well-diversified portfolio of international equities. The managers will adjust the asset allocation from time to time depending upon market circumstances, but not to an extent that would significantly alter the long-term risk-return profile of the investment strategy. The portfolio combines active fund managers, who aim to outperform their benchmarks (after costs), and passive investments, which offer cost-effective market exposure. The aim is to achieve better returns than the underlying markets while controlling the overall cost of the investment.

Suitability

This portfolio may be suitable for investors who have an extended investment time horizon of 12–15 years and substantial previous investment experience. They are seeking an investment offering the unconstrained return opportunities of overseas equity markets with diversification that reduces the risks associated with single-stock investments. Investors accept the significant capital volatility of a diversified equity investment in order to achieve their longer-term return targets. They believe that overseas equity investments offer the potential for superior returns compared with the UK equities market, or already have balancing UK equity exposure within their wider investment portfolio.

Strategic Asset Allocation (%)

Source: Octopus Investments. The pie chart shows the asset allocation of the underlying holdings of the funds that make up the portfolio. It looks to give an indication of the UK and international asset classes that the underlying investments could give exposure to. Please note that the asset allocation may be above or below 100% due to rounding.

Performance

Since launch (%)

Cumulative performance (%)

	1 month	1 year	3 year	5 year	Since launch
International Equity Focus	4.76	6.74	48.21	73.14	135.34

Glossary

Asset allocation

This describes the allocation of the portfolio's assets according to geographical region, sector or type of security.

Asset classes

These are categories of assets, such as cash, company shares, fixed income securities and their sub-categories, as well as tangible assets such as real estate.

Bonds

A loan in the form of a security, either issued by a UK or overseas government (government bonds) or company (corporate bonds), which pays a fixed rate of interest over a given time period, at the end of which the initial amount borrowed is repaid.

Equities

Shares of ownership in a company.

Passive investments

Passive management is a style of investment management that aims to replicate the performance of a benchmark or index.

Volatility

Volatility is a measure of how quickly the value of an investment rises and falls over time and is a term applied to single shares, markets and collective investment schemes.
