Liquidity target 1: Running regular share buybacks		✓	✓
Liquidity target 2: Completing share buyback at a cost of 5% to NAV		✓	✓
Tax relief: VCT qualifying status maintained		✓	✓
Product passed annual stress and scenario testing		✓	✓
Survey distributors to understand processes in place to ensure product is sold within the target market		✓	N/A**
Product sold only via the defined distribution channels		✓	✓

*Due to the VCTs merging, outcomes are considered from 2010 onwards rather than since inception

**Distributor target market introduced in 2018 has been completed annually since then

Despite capital growth not being achieved during the last 12 months, overall a good outcome for customers had been achieved over the review period. Short term volatility is a feature of the alternative investment market and performance of the VCTs was in line with FTSE AIM All Share. Capital growth has been achieved over the longer term. The VCTs have maintained their dividend target over the period.

Price and value

A good outcome for customers is every investor having been provided with the core product services, product features being achieved and no equivalent level of product and service being available for a lower fee elsewhere

Fees charged for the Octopus AIM VCTs

Investing through an adviser

Type of charge	Rate	Occasion of charge
Initial fee	3%	On investment
Annual management fee	1.5%	Ongoing

The above fees relate to the product fees charged by Octopus Investments. Separate charges, such as adviser payments may be facilitated in addition to the above.

Investing directly

Type of charge	Rate	Occasion of charge
Initial fee	5.5%	On investment
Non-advised ongoing charge	0.5%	Ongoing
Annual management fee	1.5%	Ongoing

Octopus charges an annual management charge of 2% per annum. However, Octopus reduces this by the amount of the maximum ongoing adviser charges, execution-only commission and direct application charges. This creates an 'effective rate' of 1.5% for the first nine years, while the adviser charges may be paid.

The Octopus AIM VCTs place invested capital at risk. The value of an investment, and any income from it, can fall as well as rise and investors may not get back the full amount invested. In particular, the shares of VCTs could fall or rise in value more sharply than shares in larger, more established companies. They may also be harder to sell.

Tax reliefs available on these investments depend on individual circumstances. Tax treatment is assumed as per current legislation and interpretation, which may change in the future. Tax reliefs also depend on the portfolio companies maintaining qualifying status, which is not guaranteed.

Past performance is not a reliable indicator of future results.
