The Octopus AIM Inheritance Tax Service places invested capital at risk. The value of an investment, and any income from it, can fall as well as rise and investors may not get back the full amount invested. In particular, the shares of smaller companies could fall or rise in value more sharply than shares in larger, more established companies. They may also be harder to sell.

Tax reliefs available on these investments depend on individual circumstances. Tax treatment is assumed as per current legislation and interpretation, which may change in the future. Tax reliefs also depend on the portfolio companies maintaining qualifying status, which is not guaranteed.

Past performance is not a reliable indicator of future results.

The investments discussed are not suitable for everyone. This document does not constitute advice on investments, legal matters, taxation or any other matters. Any recommendation should be based on a holistic review of a client's financial situation, objectives and needs.

Investors should read the product brochure before deciding to invest, this can be found at **octopusinvestments.com**.
