

# Investment Profile 10

## International Equity Focus

Data as at 31 October 2019

### Key Facts

Launch Date 28 September 2009  
 Currency GBP  
 Suggested Time Horizon\* 12-15 Years +

\*There is no required minimum holding period

### Objective

A global growth strategy which aims to deliver the highest returns achievable, through a well-diversified portfolio of international equities. The managers will adjust the asset allocation from time to time depending upon market circumstances, but not to an extent that would significantly alter the long-term risk-return profile of the investment strategy. The portfolio combines active fund managers, who aim to outperform their benchmarks (after costs), and passive investments, which offer cost-effective market exposure. The aim is to achieve better returns than the underlying markets while controlling the overall cost of the investment.

### Suitability

This portfolio may be suitable for investors who have an extended investment time horizon of 12-15 years and substantial previous investment experience. They are seeking an investment offering the unconstrained return opportunities of overseas equity markets with diversification that reduces the risks associated with single-stock investments. Investors accept the significant capital volatility of a diversified equity investment in order to achieve their longer-term return targets. They believe that overseas equity investments offer the potential for superior returns compared with the UK equities market, or already have balancing UK equity exposure within their wider investment

### Performance

#### Since launch (%)

#### Cumulative performance (%)

	1 month	1 year	3 year	5 year	Since launch
