

Investment Profile 5

Moderate Capital Growth

Data as at 31 October 2019

Key Facts

Launch Date 28 September 2009
 Currency GBP
 Suggested Time Horizon* 6 Years +

*There is no required minimum holding period

Objective

Aims to generate sustained capital growth over the medium to long term by investing in global equity markets, while using other asset classes and strategies to reduce the volatility associated with equity investing. The managers invest in equity funds and alternative investment strategies, as well as bonds. The managers will adjust the asset allocation from time to time depending upon market circumstances, but not to an extent that would significantly alter the long-term risk-return profile of the investment strategy. The portfolio combines active fund managers, who aim to outperform their benchmarks (after costs), and passive investments, which offer cost-effective market exposure. The aim is to achieve better returns than the underlying markets while controlling the overall cost of the investment.

Suitability

This portfolio may be suitable for investors with a time horizon of six years or more and who wish to grow their investment beyond the impact of inflation. Investors therefore accept some capital value fluctuations in the short and medium term in order to achieve an acceptable rate of return over the longer term. As the fund is a long-term investment there may be years when the capital value of the portfolio is reduced until market valuations recover again.

Performance

Since launch (%)

Cumulative performance (%)

	1 month	1 year	3 year	5 year	Since launch
Moderate Capital Growth	-1.02	6.60	11.98	30.50	77.64
FTSE A British Govt All Stocks	-1.82	10.28	12.39	29.91	69.16
FTSE All-Share TR	-1.40	6.79	19.31	37.89	116.81

Discrete yearly performance (%)

	Q3 2018 Q3 2019	Q3 2017 Q3 2018	Q3 2016 Q3 2017	Q3 2015 Q3 2016	Q3 2014 Q3 2015
Moderate Capital Growth	3.78	4.20	6.01	13.13	1.42
FTSE A British Govt All Stocks	13.36	0.62	-3.56	12.64	8.21
